

ACS 560 Software Engineering

HW1 (Due on Sept. 3, 6pm in class)

(1) Use the following languages to show "Hello World!":

- C/C++ (Under Linux using gcc or under Windows using Dev-C++ or Microsoft Virtual Studio www.microsoft.com/express/)
- Java (Eclipse <http://www.eclipse.org/downloads/>)
- Python (<http://www.python.org/getit/>)
- C# (Microsoft Virtual Studio www.microsoft.com/express/)
- HTML (Notepad)
- JavaScript (Note: You can use HTML file to call JavaScript program and use Notepad to edit JavaScript program.)

If you do not know any of these languages, please google and find more information about them. In the submission, please provide the source code and the screenshot of execution results.

(2) Find a way to download all files and directories from
<http://students.cs.byu.edu/~cs340ta/summer2013/notes/>

Please avoid downloading them one by one manually. Please google the method and find a tool to download the entire course materials for you. Please include the screenshot of running the tool.

Please submit both soft copy and hard copy with your programs and results to the instructor. Please send the soft copy to zchen@engr.ipfw.edu. Please hand in the hard copy right before the class on Sept. 3.
