- Why do you choose this course? What are your expectations for this course?

- Are you a full-time student or a part-time student? If part-time, are you working as a software engineer now?

- How many programming languages do you know or are you using? If using 10 as an indicator of expert and 0 as an indicator of knowing nothing, please choose a number between 0 and 10 for each language listed below:

  - C   (   )

  - C++   (   )

  - Java   (   )

  - Python   (   )

  - VB.Net   (   )

  - C#   (   )

  - JavaScript   (   )

  - Scala   (   )

  - Assembly Language   (   )

  - Perl   (   )

  - SQL   (   )

  - PHP   (   )

- o List other languages you are familiar with:

- Are you familiar with UML?

- Are you familiar with Socket Programming?

- Are you familiar with Design Patterns? If so, please list some design patterns that you know well.

- Are you familiar with Refactoring? If so, please give a definition of Refactoring.

- Did you apply Automation Testing in your previous/current projects?

- Do you know what is DRY? Do you apply DRY in your coding?

- Did you use any version control system (VCS) before? If so, which VCS?

- Do you feel comfortable to do the coding under Windows, Linux, or Mac OS X?
